Federal Trade Commission  
Office of the Secretary  
600 Pennsylvania Avenue, NW, Room CC-5610 (Annex N)  
Washington, DC 20580

RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern:

Anyone with knowledge of fuels and internal combustion engines knows that ethanol is bad for a wide variety of engine components. It cost more to produce and mix with gasoline, and yet we continue to be forced to use it as a fuel. I ride a relatively high end motorcycle, and regularly must put a fuel stabilizer into my tank to help prevent issues with water and fuel line deterioration. And all of this creates problems in the farming industry to boot. Will our government ever get out of our lives???

Sincerely,  
Bruce Knowles, FL
