RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern:

Now that official recognition of ethanol's damage to engines is confirmed, it's time to go further and BAN ETHANOL in fuel. DO NOT ALLOW 15% ETHANOL to be produced. It will void warranties and cause a huge amount of economic hardship for everyday folks. I cannot afford to replace the new lawnmower that I barely scraped up the money to buy last year when I had mine stolen. It clearly shows NO 15% ethanol right on the filler cap.

I also ride vintage motorcycles and have been trying to find only ethanol-free fuel, as it severely degrades the rubber seals throughout my engines.

Food should be eaten, NOT made into destructive, crappy "fuel" that destroys engines, engine components, reduces power AND reduces fuel efficiency. BAN ALL ETHANOL BASED FUEL NOW!!!!!!!

Sincerely,  
Judy Hawkins, WA
