RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

I've put alot of money into my vintage motorcycle. As it is, I have to clean my fuel system every year (sometimes more than once) and replace fuel lines due to deterioration from ethanol related moisture & associated deterioration of rubber & other gasket materials.

I'm already experiencing decreased mileage (probably power too) and increased maintenance costs with a nod to the environment. The environmental cost to produce the alcohol far exceeds any reduction of emissions you may see from my motorcycle.

Sincerely,
Jim Hopkins, TN
