RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

Ethanol tears up the elastomers in my engines. The fuel economy is worse. It takes lots of fuel to farm the raw materials - no fuel savings! It must be trucked around the country because it's too corrosive for pipelines. The food prices are driven higher.

Where is the benefit??? This is a scam on the nation and another example of government mandates that are in opposition to the citizens' better interests.

Knock it off already!!!!

Sincerely,
John Light, DE
