RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

I do not want any ethanol fuel. Ethanol fuel has a short life span and "gums up" the insides of carburetors and their fuel delivery systems on engines. This requires costly repair bills. This a safety issue because if the engine fails while being operated dependably; the operator and those around that person are at risk of injury as this may cause a vehicle accident. Thank you.

Sincerely,
jeffrey dion, VT
