RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

Please consider taking ethanol laced fuel off the market. I have seen numerous problems this fuel causes to rubber lines metal & plastic floats as well as carburetor parts & gumming up fuel lines & screens as well as the potential from fires. The fuel is not safe now nor was in at the turn of the century when Model A's were available.

Sincerely,  
Travis McCray, AR
