RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

Adding yet more labels to our fuel pumps is an absolute waste of time and money! Have you seen all the labels and warnings festooning our fuel pumps already? Why not let the free market decide? Consumers should be offered a choice of non-ethanol blended fuel or ethanol blended. I believe this proposed legislation is yet another cop-out by the EPA. It's the simplest "solution" imaginable while totally failing to address the problem!

Most of us motorcyclists treasure all of our vehicles. I'd submit that as a whole, we probably maintain them at a higher state of tune than most of the motoring public. Please don't saddle us with yet another product that could damage our vehicles!

Sincerely,
George Heberling, DE
