RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

I believe motorcyclists would suffer drastically from this new fuel. Motorcyclists already struggle to find affordable, quality gasoline that allows good performance without damaging their machines. This new fuel would certainly cause more problems for us. The only way I can see this new fuel not being confused with the current fuels in use, is to have completely separate pumps offering this fuel. The signage used needs to be a different color than the current signage used on pumps today as well. I hope this issue is appropriately dealt with and all parties involved can come to a logical, safe implementation of any type of fuel not currently on the market. This is vital to the survival of many of our motorcycles on the road today.

Sincerely,
Barry Anglemyer, AZ
