RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

The ethanol in the gas first has dramatically reduced the mileage in my present car and is not suitable for my 3 motorcycles. This creates all sort of problems because of the higher exhaust temperatures and it's effect on the components. Instead of using food for fuel and importing our food, we should be making use of all our resources to become energy independent, lowering fuel cost and getting our economy moving and putting people back to work.

Sincerely,
Richard Strobel, NY
