RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

Ethanol blends have been shown to decrease fuel mileage and raise engine temperature and cause damage to fuel lines and engine parts. As an owner of two motorcycles with carburetors which have required rebuilds, and the gas tanks on both have also needed to be resealed, I do not want perform additional maintenance due to increased ethanol in motor vehicle.

Sincerely,  
Stephen Smith, VA
