RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

I have several vehicles that E-15 would cause severe damage to the engines. One is an antique car and motorcycle, motorcycle, 2014 vehicle, which the hand book warns against using E-15/plus they will not cover damage caused by E-15 fuels and numerous small engine items such as, compressor, generators, lawn equipment, etc.. Ethanol is known to attract moisture which causes engine damage. The EPA has no consideration for my well being in this matter. I want the E-15 fuels to be dropped from regulations and E-15 or high ethanol fuels to be eliminated.

Sincerely,
Robert Sampson, MO
