RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

You have E-10, E-25, & E-85 Just who are you marketing E-15 to? I work for a big farmer and most of the farmer in my area don't use any ethanol gas if they can help it. The farmer that I work for for the most part don't even sell there corn to any ethanol plants. I am a member of A.B.A.T.E. of ILLINOIS and our 2013 Fex-fuel E-85 Ford F-150 pickup truck with only 38,000 miles. Burned up 4 of its 8 pistons running E-85 all the time, and that is a so call motor that can run ethanol fuel. I run OLDER Motorcycles, Lawn mowers, & Cars and Trucks and I have to put more and more gas in them but only get half has far with this ethanol gas. I have to run at least a half gallon more of ethanol gas per mile then I do with no ethanol gas. So just how is that better for every one? Its not.....

Sincerely,  
Dennis Yeager, IL
