RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

I have first hand knowledge that ethanol is causing problems in most of my machinery. My generator pet cock has melted, weed eater and blower machines have problems with rubber parts in fuel system that need replacing twice a year. Motorcycle jets clog in as little as three months when not being used. this is a disaster, please stop using ethanol in are fuel

Sincerely,
David Donatoni, CA
