RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

Please help the FTC understand that motorcyclists like myself are gravely concerned about being able to easily obtain fuel for our motorcycles as new ethanol blends become increasingly present in the market.

Diesel vehicles don't run well on gasoline, consequently there's always a seperate fuel pump that's a different color to prevent a diesel vehicle from accidentally being filled with gasoline.

Similarly, I would personally like to see another pump (with its own distinct color) dedicated to fuel that is safe for use in motorcycles and ATVs.

We deserve the same level of protections as the owners of diesel vehicles!

Sincerely,

Ted Hallum, VA
