RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

I'm writing regarding the EPA finding of potential damage to combustion engines using ethanol concentrations greater than 10%. My concern is the risk to motorcyclists and ATV operators like my wife, children, grandchildren, friends and myself being stranded, injured or worse as the result of mechanical failures that are fuel related. Labeling and warnings are a poor substitute for intelligent, practical research and marketing of any product that proves beneficial to consumers. Until products are proven not only harmless but beneficial I question the wisdom of making such products available for consumer consumption. I appreciate your consideration.

Sincerely,
Douglas Meyer, AZ
