RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

Given the fact that the EPA has acknowledged that introduction of E15 and higher-ethanol-content fuels can adversely impact the operation of many engines, I strongly urge you and your office to oppose the introduction of such fuels to the American marketplace. Mere labeling is a band-aid that does not address any of the serious concerns regarding these fuels.

Sincerely,
Michael Hinton
California
