RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

I don't think that E-15 should be forced on me to ruin my low-mileage 2006 Suzuki air-cooled motorcycle. The EPA has too much power in my opinion. But, aside from that, it is deception toward consumers not to correctly label fuel, and that, I submit, would be to engage knowingly in tricking consumers, which amounts to fraud, even if done so to further the emotional needs of some persons with strong environmental opinions. Even motorcycle-owning Sierra Club members deserve not to have their transportation investments trashed through labeling deception.

Sincerely,
Rebecca McNamee
Texas
