RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern:

I do understand that there are many sides to the ethanol issue and I appreciate the lobbying efforts from corn growers are a compelling force.

That said I would ask that you put politics aside and consider the consumer and by extension, your constituents.

The science demonstrates that E15 is unsuitable for gasoline engines given current technology.

I would ask that you table the issue until technology catches up to alternative fuels.

I do believe you will garner far more support from the electorate if you table this issue than if you bow to the will of special interests.

Respectfully,

Randy Schuler, AZ
