Washington, DC 20580

RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern:

Ethanol content at 10% is already demonstrating potential to damage engine component. Personal experience with this issue has occurred with both plastic float bowls in older carbs on Motorcycles and fuel pump issues with fuel pumps on more modern vehicles I own.

I oppose any increase in ethanol above 10% and consider such action as blatantly disregarding the needs of the consumer.

Sincerely,
Allen Jones, NC
