RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern:

To allow more ethanol into gasoline is just plain stupid. Small engines like lawnmowers and most motorcycles are air-cooled. The extra heat given off with damage them and cut their useful life short. This causes unnecessary expense and more energy use to replace/repair them.

Please stop E-15 and try to eliminate all ethanol. This was a bad idea that makes people angry at their elected officials and policy-makers.

Sincerely,
Dante Langston, CO
