RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

It is my belief that ethanol fuels are causing harm to most vehicles. I own several old tractors, a few mowers, weed eaters and chain saws as well as a motorcycle and off road side by side. I have seen damage in all of these types of vehicles from running ethanol. I now run 100 % gas in all of these machines. What research I have read also indicates that ethanol lowers fuel economy and raises the price of our food. I am not a fan of ethanol at all. Please make sure the uneducated public can tell the difference at the pump.

Sincerely,
Bobby J. Moretz, NC
