Washington, DC 20580

RE: 16 CFR Part 306; Automotive Fuel Ratings, Certification and Posting; Project No. R811005

To Whom It May Concern,

I'm a professional engine technician and know the damage ethanol does to all engines. In addition to engine damage, it also reduces engine performance because it produces less horse power and thereby reduces MPG. The proposed labeling will be mostly useless because most motorists will not read them no matter where they are placed on the pumps. I strongly oppose increasing the % of ethanol in gasoline and for a matter of fact, I oppose any % of ethanol in gasoline.

Sincerely,  
Michael Sedlock, MT
