I am tired of getting these ROBO calls without any caller ID or phone number during lunch or dinner time. I should be allowed to have my Do not call registry honored and have an input as to who I allow to call. This means choosing if I don't want political, charitable, or any kind of advertisement stopped if I choose. This is MY PERSONAL phone that I PAY for and should have control of who calls me.

Dear FTC,

I had been getting these calls for a long, long time on landline and cell. Finally I recorded date/number info if available. Land line calls/day over 6 days ranged from 1 to 7, some calling numbers repeated.

In desperation I went online to check status of my "do not call," and found both land line and cell numbers are listed.

Strangely or coincidentally --- after checking status, these calls fell off dramatically. did inaction on my part finally convince initiators to cease and desist? Did my checking register somehow act as signal for them to stop?

It's a unnecessary inconvenience, also downright rude. I have received morning calls before 8 am and evening,after 10 pm.

Please stand up for consumers, and strengthen the nation's telemarketing regulations!

Even though I have filed numerous complaints with the FTC regarding violations of the DNC law, I have NEVER received ANY information that ANYTHING was ever done about any of them! Rachel at card services has been replaced by Lisa and the list goes on. My conversations with some of these offending telemarketers revealed that they could care less about DNC laws and that they feel there is nothing that the FTC can do to stop them! Even our local newspaper (the Belleville News-Democrat) had people call trying to sell newspaper subscriptions. When I mentioned that I was on the DNC list, they said that it didn't apply to them. REALLY!!! Well, if it doesn't, it should, and if it does? Well, you can see how concerned they are about violating it. A law is only as good as the effort placed in enforcing it! Pass laws with some teeth and grow a pair and enforce them!!!

I strongly agree with the plea above. My entire family is on the Do Not Call Registry, and we have renewed this regularly. It does not work. Now, we get these unsolicited calls on our cell phones, too.

You need to do something.

My Dad, who recently passed away, had mobility issues. He was in his upper 90s and lived for our calls. About 5 times a day and into the evening, he would receive annoying calls - the same ones we also receive. He would jump out of his chair, and sometimes he got faint or wobbled. This is what he would hear: "Hello, this is Rachel from card-holder services." How many times have we all heard that one? The elderly can be deceived into giving out personal financial information by these calls. Or, "Did you know that the FBI reports that every 10 seconds a home is broken into?" No, I did not know that, but if I was an elderly person or disabled person living on my own or in an insecure environment, I would be terrified. Or, "I'm calling about your current electric bill." Same problems, same fear. It goes on. Please put your selves in our place and instigate the correct and profound regulations that we need.

Please stand up for consumers, and strengthen the nation's telemarketing regulations!

Sincerely,  
Ms. Nancy Cohen

I get numerous calls daily from telemarketers obviously using automatic dialers. This results in my answering the phone and finding no one there; someone else answered the auto-dial first. Or: I answer to be greeted by a recorded message and if interested must respond by pushing a number. These are mostly what I get although there are variations.

My number is on the do not call list which is obviously being ignored. I have also filed complaints but nothing has been done as the same people still call me.

I get calls from unidentified companies who say they represent my credit card company(s) and want to help me get my interest rate lowered and other services. This is not honest. I called my Credit Card providers and they told me they had no affiliation with those companies. I have used \*69 to retrieve their phone number and complain and also filed a formal complaint with FTC in the past but the phone harassment continues.

Please put a stop to this flagrant abuse and phone harassment!

Thank you

When the Do Not Call Registry first came out a couple years ago all telemarketing call came to an abrupt stop! Fantastic! However, about two years ago they started up again calling me several times a day every day! I've renewed my registry to the "do not call" several times to no avail. I've asked them to stop, I've reported phone #'s but nothing helps. This must stop!

I am tired of receiving several of these telemarketing calls each and every day of the week, even though I am on the "Do Not Call List." I have asked several of the callers representing charities as to what percentage of a donation actually goes to the charity. The maximum amount appears to be less than 15%, so these telemarketers are engaged in misrepresenting how much good a donation does, hence isn't this also consumer fraud?

Even though our phone numbers are on the "Do Not Call Registry" My wife and I still receive annoying telemarket calls on a daily basis. Specifically, I ask that you require these companies to use honest caller ID designations. Not only do they come up with obviously fake numbers, but sometimes the same caller will use multiple numbers to throw off call blocking. And now things like "Neighbor" on recorded calls. All of them telling me "Your doctor, a relative, or concerned friend has referred your name to receive our medical devices. Free!! And over \$1,000.00 worth of coupons!!! Just touch #1 to learn how to receive them!!!"

Dear FTC,

Something has to be done. Telemarketers are bad enough, but at least they employees are trying to earn a living. The worst are automated calls, recordings telling me it's an important call. That's my clue to hang up. If it's so important, pay someone to call me directly.

In the past week I've been getting roughly 5-10 calls per day from energy companies. I work from home and have to answer calls even if I don't recognize a Caller ID number in case it's a potential client. When I get one of those robo calls I hang up....but they don't. They monopolize my phone line for a good 30 seconds, so if I had an emergency right then I couldn't call 9-1-1.

Specifically, I ask that you:

- 1) Strengthen Do Not Call Registry enforcement by requiring telemarketers to provide recordings of their calls.
- 2) Ban third-party use of my personal account information (pre-acquired account info) unless I give consent.
