Re: Contact Lens Rule, 16 CFR Part 315, Project No. R511995

To Whom It May Concern:

As a Doctor of Optometry and a frontline provider of essential eye health and vision care in our local community, I am writing you today to notify you of my opposition to the proposed change to the Contact Lens Rule that would require prescribers, like me, to obtain a signed acknowledgment from patients stating that they received a copy of their prescription and that they were informed that they are free to purchase contact lenses from the seller of their choice.

I understand and agree with the Contact Lens Rule and what it is trying to accomplish. I, myself, appreciate the opportunity to sell contact lenses to all patients, even ones who bring in a prescription from another provider. However, I can tell you that requiring more time and paperwork of eye care practitioners like myself, is a burden that is unnecessary and unfair. I support a change in the rule along the lines of option (d) from page 88534 of the Proposed Rules issued by your office that would require some sort of signage to try and strengthen and achieve the goals of the Contact Lens Rule. I believe that this solution would be more appropriate.

Thank you in advance for your time and consideration.

Respectfully Submitted,

Mark Lantz, O.D.

Re: Contact Lens Rule, 16 CFR Part 315, Project No. R511995

To Whom It May Concern:

As a Doctor of Optometry and a frontline provider of essential eye health and vision care in our local community, I am writing you today to notify you of my opposition to the proposed change to the Contact Lens Rule that would require prescribers, like me, to obtain a signed acknowledgment from patients stating that they received a copy of their prescription and that they were informed that they are free to purchase contact lenses from the seller of their choice.

I understand and agree with the Contact Lens Rule and what it is trying to accomplish. I, myself, appreciate the opportunity to sell contact lenses to all patients, even ones who bring in a prescription from another provider. However, I can tell you that requiring more time and paperwork of eye care practitioners like myself, is a burden that is unnecessary and unfair. I support a change in the rule along the lines of option (d) from page 88534 of the Proposed Rules issued by your office that would require some sort of signage to try and strengthen and achieve the goals of the Contact Lens Rule. I believe that this solution would be more appropriate.

Thank you in advance for your time and consideration.

Respectfully Submitted
