Problem?

Privacy Policies, *As the de facto Privacy Notice Mechanism*, are long and complex

201 hours per year on average to read policies of services we encounter*

*(McDonald and Cranor -2008)

Approaches So Far?

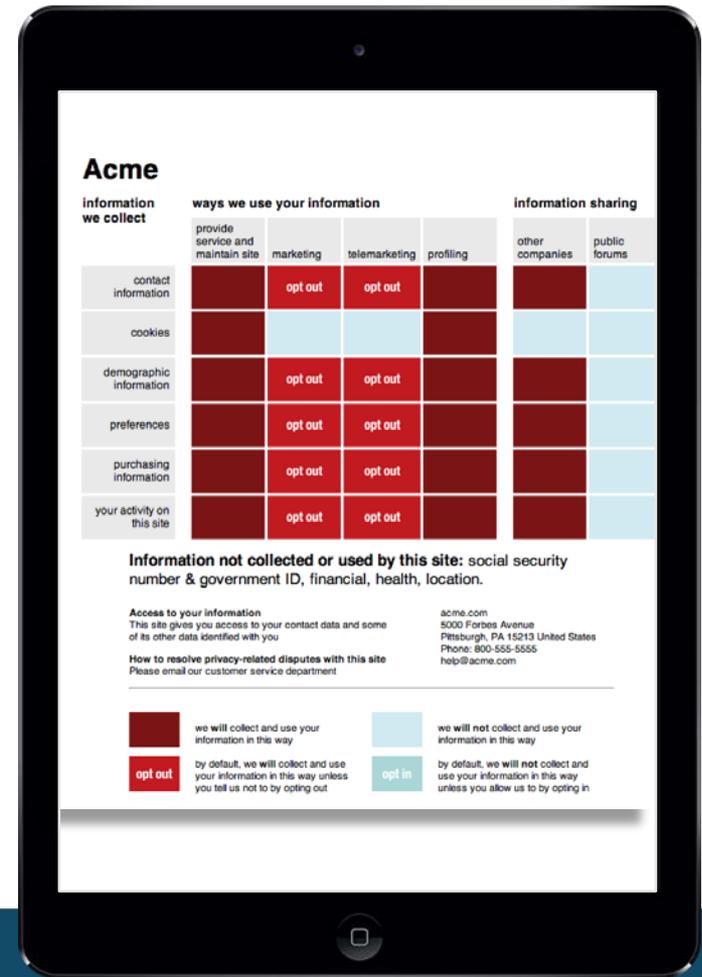

Put more lawyers on the task.

Standardization

- A Nutrition Label for privacy
- Required providers to act
- Surprise: They didn't.

Kelley et al., "A nutrition label for privacy." SOUPS'09

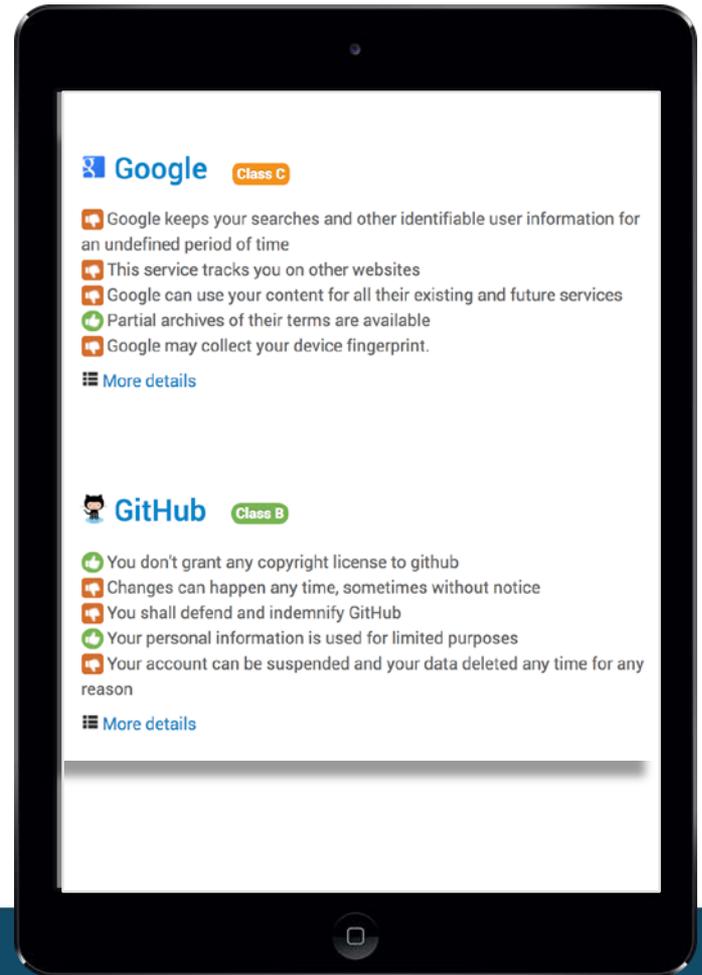

Crowdsourcing

- TOSDR.org
- Limited by volunteers' availability
- Available for ~100 policies
- Unstructured → can only be used for limited automated labeling*

*Zimmeck and Bellovin, "Privee: An Architecture for Automatically Analyzing Web Privacy Policies". USENIX Security 2014

Manual work doesn't scale.

Fails to cope with emerging technologies.

Voice-Activated Devices

- Read the whole policy?
- Show tables on small screens?

TRUSTe & Disconnect Introduce Visual Icons to Help Consumers Understand Privacy Policies

June 23, 2014

Today, privacy innovators TRUSTe & Disconnect have launched Privacy Icons software to help consumers easily understand website privacy policies and how websites are handling their data.

Consumers want to know how websites are using their privacy and data, but they often do not have the time or patience to read existing privacy policies, which are typically quite long and complex. According to The [TRUSTe Privacy Index](#), the average privacy policy is 2,464 words long and takes about 10 minutes to read.

Structured Query Example

Expected Collection

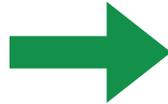

Does this website's privacy policy disclose whether it allows other companies like ad providers and analytics firms to track users on the site?

Red = Yes, without choice to opt-out. Or, undisclosed.

Yellow = Yes, with choice to opt-out.

Green = No.

Gray = Info unavailable.

Structured Query

```
color: yellow
category_filters:
-
  fun: include_some_in_list
  lst: ['third-party-sharing-collection']
value_filters:
-
  fun: include_some_in_list
  lst: ['purpose_advertising','purpose_analytics-research']
-
  fun: include_some_in_list
  lst: ['action-third-party_track-on-first-party-website-app',
        'action-third-party_collect-on-first-party-website-app']
-
  fun: include_some_in_list
  lst: ['choice-type_opt-out-link',
        'choice-type_opt-out-via-contacting-company']
decider:
-
  fun: not_empty
```
