Christopher R. Burrow, M.D. joined the Humetrix executive team in 2010 and is the company's principal data security and privacy officer. He is a physician-scientist and biotechnology executive/entrepreneur in the field of genomics and personalized medicine. As a clinician and health information data specialist, Dr. Burrow has played a key role in the development of Humetrix Blue Button enabled mobile apps, iBlueButton and ICEBlueButton, working closely with the software development team.

Joseph Lorenzo Hall is the Chief Technologist at the Center for Democracy & Technology. His work focuses on the nexus between technology, law, and policy, ensuring that technology and technical considerations are appropriately embedded into legal and policy environments.

Sally Okun, RN, MMHS, Vice President for Advocacy, Policy and Patient Safety at PatientsLikeMe is responsible for patient voice and advocacy initiatives, participates in health policy discussions at the national and global level, oversees the company's patient safety initiatives, and acts as the company's liaison with government and regulatory agencies.

Heather Patterson is a postdoctoral research fellow at New York University's Information Law Institute and Department of Media, Culture, & Communication, where she researches changing social norms regarding personal information sharing and expectations of privacy, with an eye toward developing policy solutions that facilitate context-appropriate information flow.

Joy Pritts joined the Office of the National Coordinator for Health Information Technology, Department of Health & Human Services in February 2010 as its first Chief Privacy Officer. Ms. Pritts provides critical advice to the Secretary and the National Coordinator in developing and implementing ONC's privacy and security programs under HITECH.
