Re: Improper Orange Book Patent Listings for Anoro Ellipta and Trelegy Ellipta

Dear Messrs. Ford and MacRae,

On September 14, 2023, the Federal Trade Commission ("FTC") issued a Statement Concerning Brand Drug Manufacturers’ Improper Listing of Patents in the Orange Book.¹ The Policy Statement, a copy of which is appended to this letter, highlights the negative impacts that improper Orange Book patent listings may have on drug competition and notifies market participants “that the FTC intends to scrutinize [such] improper listings as unfair methods of competition in violation of Section 5 of the Federal Trade Commission Act.”²

This letter is to inform you that we believe certain patents have been improperly or inaccurately listed in the Orange Book with regard to GlaxoSmithKline Intellectual Property Development’s Anoro and Trelegy Ellipta products and that we have availed ourselves of the

As the Policy Statement explains, patents improperly listed in the Orange Book may delay lower-cost generic drug competition. By listing their patents in the Orange Book, brand drug companies may benefit from an automatic, 30-month stay of FDA approval of competing generic drug applications.⁴ In addition to delays resulting from such a stay of approval, the costs associated with litigating improperly listed patents may disincentivize investments in developing generic drugs, which risks delaying or thwarting competitive entry. The Supreme Court has recognized that improper Orange Book listings prevent or delay generic drug entry.⁵ Even brief delays in generic competition can reduce patient access to more affordable alternatives and increase costs across the entire health care system.⁶

For decades, the FTC has sought to reduce the anticompetitive effects that result from improperly listing patents in the Orange Book, through enforcement and through amicus briefs articulating that improper listings may violate the antitrust laws.⁷ The FTC’s Policy Statement serves to reinforce the FTC’s concerns about the anticompetitive consequences of improper Orange Book listings and provide notice that the “FTC will continue to use all its tools to halt unlawful business practices that contribute to high drug prices.”⁸

As detailed in the Policy Statement, the FTC has several tools at its disposal to address improper Orange Book listings. One of those tools is using the FDA’s process to dispute “the

---

³ The Orange Book listings identified as improper in this chart should not be read as an exhaustive list of every patent that your company may have improperly submitted. Indeed, your firm bears the burden of listing patents in the Orange Book accurately and in accordance with all relevant statutory and regulatory requirements.

accuracy or relevance of patent information submitted” to the FDA for publication in the Orange Book.9

We have opted to use the FDA’s regulatory dispute process to address the improper listings, but we retain the right to take any further action the public interest may require, which may include investigating this conduct as an unfair method of competition under Section 5 of the FTC Act, 15 U.S.C. § 45, and as described in the Policy Statement.

Sincerely,

/s/ Rahul Rao
Deputy Director
Bureau of Competition
