Statement of Commissioner Melissa Holyoak
March 19, 2025

Congress entrusted the FTC with a critical role in protecting Americans by promoting competition and preventing fraud. I agree with Chairman Ferguson that, as I have said before, the President has the constitutional authority to remove Commissioners. President Trump exercised that authority yesterday. But this does not change the FTC's mission or the urgency of our work. I will continue to work with our dedicated staff to further the FTC's important mission.
