Folks, we may never get to the actual truth of the disease. The very thing we need to do to protect ourselves during this crisis is the exact same thing we needed to do before the virus became our problem: We need to take responsibility for our own health. So if you've been struggling with any health issues, now is the time to address them. And if you're healthy, continue taking the proper supplements that will boost your immune defense against the virus.

‘At present, more than 50,000 confirmed patients have been discharged, and most patients have used traditional Chinese medicine. The expert team research confirmed that compared with the simple use of traditional Chinese medicine and western medicine, the combination of traditional Chinese medicine and western medicine can quickly improve symptoms such as fever, cough, and fatigue, shorten the length of hospital stay, and increase the rate of nucleic acid negative. A 75-clinical controlled trial showed that the combined use of Chinese and Western medicine compared with the simple Western medicine group reduced the nucleic acid negative time and hospitalization time by an average of 3 days.’
