- “About Us

After 9/11, we were told our enemy was the terrorist; an enemy we see and know. Today, we have a new “enemy”. It’s invisible and hides in front of our eyes. It hides invisibly on every door handle, or creeps all over us as we kiss, hug or even breathe.... How has the spectacle of Covid-19 been able to haunt 7.5 billion people and bring the world to a standstill in no time at all? ... From our research, from 100’s COVID 19 patients test, we found the 2019-nCoV Coronavirus was a new generation of viruses.... We turned to Super Power Quantum Computing. We are entering a new era of computing to fight a new era of viruses and diseases. What if we can find some chemicals that react to ambient temperature and humidity? Make a ‘shield’ or invisible barrier that stops, diverts, and or kills any viruses, bacteria, and pathogens before entering the nose, mouth, and sometimes, eyes? This would be wonderful! After thousands of tests, We developed a group of chemical compounds using IBM’s Quantum Computer, to accelerate this exceedingly tedious process and gain reliable answers.... Now, we introduce to you The 1 Virus Buster. It is a group of uniquely formed compounds, which when used correctly, omit a barrier around one’s face. This barrier kills most viruses, bacteria, and pathogens before they enter the nose, mouth, and sometimes, eyes.... The patent-pending

technology, called ISiL-Chlor technology ensures science is backing up the positive results of this virus killer.”
